RELEVANT SKILLS

- Programming Language : PHP, JavaScript
- Framework : Laravel
- Database : MySQL
- Frontend : HTML, CSS, Bootstrap
- Version Control : Git (git pull, git push, branching, rebase, conflict resolution)
- Server Management : Proficient in basic SSH commands for code deployment and server maintenance.

WORK EXPERIENCE

Fullstack Junior Developer
Opensoft Technologies Sdn Bhd
Dec 2022 - Current (1 Years)

Previous Project :

1) ECOSS System for KPDN (Kementerian Perdagangan Dalam Negeri)
- *Developed and maintained modules for the ECOSS system for KPDN, managing substantial datasets with server-side datatables.*
- *Implemented filters for efficient viewing of sales data based on various criteria.*
- *Developed the Minyak Masak Botol module, enabling companies to input, update, and verify sale information.*
- *Implemented restrictions on data entry timing and officer's access based on roles and responsibilities.*

2) ECOSS Mini System
- *Developed the ECOSS mini-system with a focus on sales and document report functionalities.*
- *Implemented filters and data categorization*

3) TPS (Trade Practice System) for MITI
- *Implemented date proposals, document circulation, and submission processes*
- *Developed a robust Submission Module within the TPS, allowing officers to manage file submissions to companies based on their roles.*
- *Implemented a dynamic checkbox system for each company, providing the option to choose between a non-confidential and a confidential file upload.*

WORK EXPERIENCE

Server Management:
- Proficient in basic SSH commands for code deployment and server maintenance.
- Ability to pull code from Git to the server.
- Experience with server-side resource monitoring.
- Familiarity with Linux servers based on Ubuntu and CentOS.
- Skillful use of vi command for editing documents directly on the server.
- File and folder operations (copying, moving, creating) on Linux servers.

ACHIEVEMENTS

- Successfully implemented and maintained critical modules in ECOSS systems.
- Efficiently handled large datasets, ensuring optimal system performance.
- Contributed to the development and enhancement of TPS for MITI.
